

LG V20 Front Facing Camera Replacement

This guide will show you how to replace the front-facing camera in the LG V20

Written By: Max Wu

INTRODUCTION

Tried to take a selfie but can't focus in on the shot? This may be because your front-facing camera is damaged and needs replacement. This guide will walk you through the steps of replacing the front-facing camera of your LG V20.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [iFixit Opening Tools](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Battery

- Flip over the phone and lift the back cover off while pressing the small button on the bottom left side.

Step 2

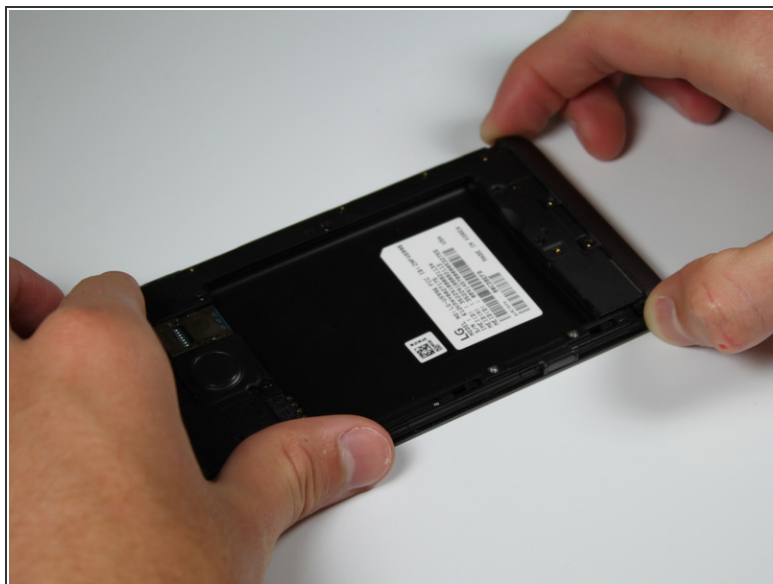

- Place your thumb along the bottom of the battery and pull up to remove the battery.

Step 3 — Midframe

- Use a screwdriver to remove the twenty-one 4mm Phillips #00 screws attaching the back cover to the motherboard.

Step 4

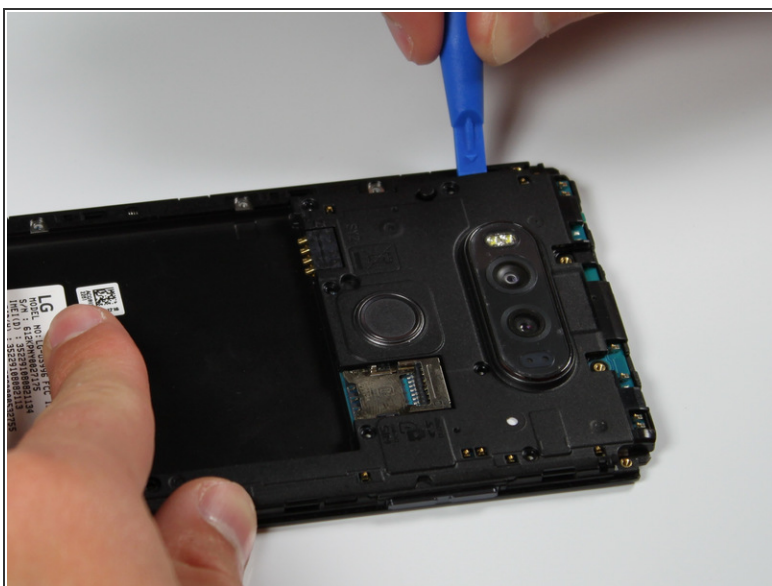

- Remove the top and bottom frame sections by applying force to one side of the frame until it pops off.
- ⓘ The covers are held together very firmly by plastic clasps, so do not be afraid to apply pressure.

Step 5

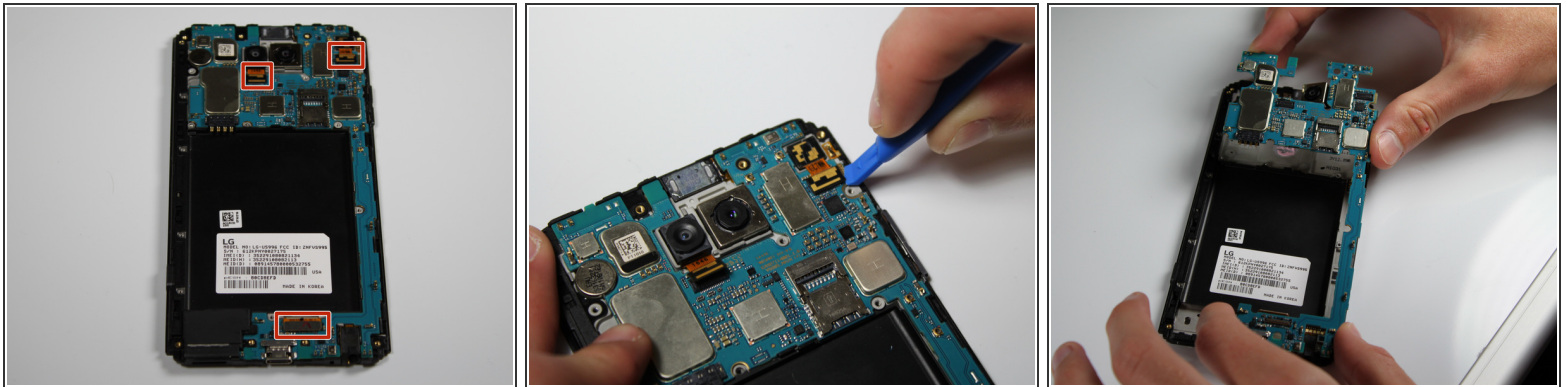

- To remove the loudspeaker at the bottom left of the device, use the blue plastic opening tool to gently pry up on the corner of the speaker.

Step 6

- Using a blue plastic opening tool, gently pry the cover up by pushing the tool down towards the device.
- Repeat this process in various locations until the cover pops off and can be removed.

Step 7 — Motherboard Assembly

- Using a plastic opening tool, gently pry up the three flat connectors that attach the front-facing camera, secondary rear-facing camera, and screen to the motherboard.
- Lift the motherboard assembly up from the device.

Step 8 — Front-Facing Camera

- Carefully lift off the front-facing camera module from the device using a pair of tweezers.

To reassemble your device, follow these instructions in reverse order.
